

Gesellschaft für Informatik e.V. (GI)

publishes this series in order to make available to a broad public recent findings in informatics (i.e. computer science and information systems), to document conferences that are organized in cooperation with GI and to publish the annual GI Award dissertation.

Broken down into

- seminars
- proceedings
- dissertations
- thematics

current topics are dealt with from the vantage point of research and development, teaching and further training in theory and practice. The Editorial Committee uses an intensive review process in order to ensure high quality contributions.

The volumes are published in German or English.

This volume contains papers from the conference “Projektmanagement und Vorgehensmodelle 2015” (PVM 2015) held in Elmshorn October 22 to 23, 2015. During the last decade, agile approaches disseminated in software development processes as well as in project management. Today, traditional and agile approaches are more and more combined within hybrid project management concepts that are applicable not only in software development & implementation projects. The conference papers discuss conceptual approaches on emerging standards and social aspects as well as practical experience in different application fields. New approaches, concepts and tools are discussed at the future track papers.
