

Gesellschaft für Informatik e.V. (GI)

publishes this series in order to make available to a broad public recent findings in informatics (i.e. computer science and information systems), to document conferences that are organized in cooperation with GI and to publish the annual GI Award dissertation.

Broken down into

- seminars
- proceedings
- dissertations
- thematics

current topics are dealt with from the vantage point of research and development, teaching and further training in theory and practice. The Editorial Committee uses an intensive review process in order to ensure high quality contributions.

The volumes are published in German or English.

ISBN 978-3-88579-647-3

This volume contains papers of the 36th GIL conference on modern information technology in the agriculture, forestry and food sectors with a focus on intelligent systems, thereby taking into account the state of the art as well as future options. The 52 papers cover a wide range of subjects from topics such as data management and interpretation, data protection, imaging, robotics, precision (livestock) farming, modelling, business planning tools and decision support or E-Learning. The conference was held at the University of Applied Sciences Osnabrück, Germany, from February 22 - 23, 2016.
